United Kingdom citizen

Research interests

Programming languages, logic, scientific databases, provenance, security, verification.

Education

Doctor of Philosophy, Computer Science, 2004, Cornell University, Ithaca, NY.

Master of Science, Mathematics, 1998, Carnegie Mellon University, Pittsburgh, PA.

Bachelor of Science, Computer Science and Mathematics, 1998, Carnegie Mellon University, Pittsburgh, PA.

Experience

Reader, Laboratory for Foundations of Computer Science, University of Edinburgh. August 2015–present.

Royal Society University Research Fellow, Laboratory for Foundations of Computer Science, University of Edinburgh. 2008–present.

Instructor, Elements of Programming Languages, University of Edinburgh, 2015–2016.

Instructor, Logic Programming, University of Edinburgh, 2009–2011, 2014.

Instructor, Distributed Systems, University of Edinburgh, 2014.

Instructor, Querying and Storing XML, University of Edinburgh, 2013.

Visiting researcher, Toyota Technological Institute, Chicago, Summer 2009.

Postdoctoral researcher, Database Group, University of Edinburgh. 2004–2008.

Funding

Small grant for research visit travel costs, £2300, GCHQ

Skye: Bridging Theory and Practice for Scientific Data Curation, €1,995,181, ERC Consolidator Grant. September 2016–August 2021.

Declarative Programming for Data Science, studentship in the Edinburgh Centre for Doctoral Training in Data Science, £80,000 co-funded by LogicBlox, Inc.

A Diagnostics Approach to Advanced Persistent Threat Detection (ADAPT), \$720,102, Defense Advanced Research Projects Agency, with David Archer (Galois, Inc.), Hoda Eldardiry (Xerox PARC), and Alan Fern (Oregon State University). July 2015–June 2019.

Foundations of Language-Based Provenance Security (renewal), £392,531, European Office of Aerospace Research and Development, US Air Force Office of Scientific Research. July 2014–June 2018.

Google Faculty Research Award, *Language-Integrated Provenance*, \$56,925, with Paul Anderson. September 2014–August 2015.

Royal Society University Research Fellowship (extension) *Nominal abstract syntax: automata, mechanised metatheory, and type theory*, £247,973, December 2013–December 2016.

A Theory of Least Change for Bidirectional Transformations, £395,170 (out of £704,188 total), EPSRC (EP/K020218/1), with Perdita Stevens (PI), James McKinna and Jeremy Gibbons (Oxford), March 2013–November 2016.

Provenance-based Security for Configuration Languages, with Paul Anderson, Microsoft Research PhD Studentship, awarded 2013.

DIACHRON – Managing the Evolution and Preservation of the Data Web, €435,837 (out of €4,989,996 total), with S. Viglas (Edinburgh PI) and P. Buneman, EU FP7 Integrating Project (601043), April 2013–March 2016.

Foundations of Language-Based Provenance Security, £72,942, European Office of Aerospace Research and Development, US Air Force Office of Scientific Research. January 2013–June 2014.

Google Faculty Research Award, *Synchronized Database Wikis*, \$38,613, with S. Lindley. January–December 2012.

Google Faculty Research Award, *Database Wikis*, \$81,679, with S. Lindley. January–December 2011.

University of Edinburgh IDEA Lab Proof of Principle Prototyping Project, *Database Wiki*, £15,500, with P. Buneman and H. Müller and S. Lindley. April–July 2010.

Royal Society University Research Fellowship, *Mechanising metatheory with nominal logic programming*, £415,068, October 2008–December 2013. (Success rate 32/592 = 5.4%)

UK eScience Institute Theme Programme on *Principles of Provenance*, £54,060, with P. Buneman (University of Edinburgh) and B. Ludaescher (University of California, Davis). April 2008–May 2009.

Research Leadership

General chair, 18th International Symposium on Principles and Practice of Declarative Programming (PPDP 2016), September 5-7, 2016

Local organizer, 26th International Symposium on Logic-based Program Synthesis and Transformation (LOPSTR 2016), Edinburgh, September 6–8, 2016.

Local organizer, 23rd International Static Analysis Symposium (SAS 2016), September 8–11, 2016.

Co-organizer, Workshop on Provenance-Based Security and Transparent Computing, Washington, DC, June 6, 2016.

Program committee co-chair, 15th International Symposium on Database Programming Languages (DBPL 2015), Pittsburgh, Pennsylvania, October 27, 2015.

Local organizer, 7th USENIX Workshop on Theory and Practice of Provenance, in cooperation with ACM SIGPLAN and SIGMOD, Edinburgh, UK, July 8-9, 2015.

Co-organizer, Dagstuhl Seminar on Programming Languages for Big Data, December 15–19, 2014.

Program committee co-chair, First Workshop on Cross-model Language Design and Implementation (XLDI 2012), Copenhagen, Denmark, September 9, 2012.

Co-organizer, Dagstuhl Seminar on Principles of Provenance, February 27–March 2, 2012.

Member, W3C Provenance Incubator Group (co-author of final report) and W3C Provenance Interchange Working Group (contributor to PROV-O ontology and editor of PROV-CONSTRAINTS recommendation).

Program committee co-chair, 4th International Workshop on Logical Frameworks and Metalanguages, Theory and Practice (LFMTP 2009), August 2, 2009, Montreal, Canada.

Program committee chair, 1st Workshop on Theory and Practice of Provenance (TAPP 2009), February 23, 2009, San Francisco, CA.

Steering committee chair, Workshop on Theory and Practice of Provenance (TAPP), 2012–present.

Theme Leader, UK eScience Institute Theme Programme on *Principles of Provenance*, 2008–2009.

Professional Service

PC member, SIGMOD 2017, Haskell Symposium 2016, IPAW 2016, FOIKS 2016, APLAS 2015, BICOD 2015, POST 2015, ICALP 2015, IFIP 2014, CIKM 2014, POPL 2014, BNCOD 2013, LFMTP 2013, IEEE BigData 2013, CSF 2013, ICDT 2013, ICALP 2012, PODS 2012, ICLP 2011, Haskell Symposium 2010, ICFP 2010, WWW 2009, POPL 2009, CIKM 2008, WebDB 2007, DBPL 2005

External review committee member, POPL 2012, ICFP 2016

Co-editor, special issue of the Journal of Functional Programming on Programming Languages for Big Data, planned for 2017

Co-editor, special issue of ACM Transactions on Internet Technology on provenance, planned for 2017

Co-editor, special issue of the Journal of Functional Programming on ICFP 2010

Referee, Communications of the ACM, Information Processing Letters, Journal of Computer and System Sciences, Journal of Functional Programming, Journal of Logic and Computation, Journal of Logical and Algebraic Methods in Programming, Journal of Symbolic Logic, Journal of the ACM, Logical Methods in Computer Science, Mathematical Structures in Computer Science, Science of Computer Programming, Theoretical Computer Science, Theory and Practice of Logic Programming, Transactions on Database Systems, Transactions on Information Systems, Transactions on Internet Technology, Transactions on Programming Languages and Systems, Transactions on Software Engineering Methodology, VLDB Journal

Reviewer, French National Research Agency; Icelandic Research Fund; Israeli Science Foundation; UK Engineering and Physical Sciences Research Council

LFCS Seminar organizer, September 2011–August 2013

Supervision

PhD students

Co-supervisor, Alessandro Spinuso, (2011–present), with M. P. Atkinson (lead supervisor). Part-time.

Supervisor, Ben Kavanagh, (2009–present), with P. Wadler (co-supervisor). Part-time; studies currently interrupted.

Supervisor, Weili Fu (2014–present), with P. Anderson (co-supervisor).

Supervisor, Stefan Fehrenbach (2014–present).

Supervisor, Sheung Chi (Arthur) Chan (2015–present).

Supervisor, Rudi Horn (2016–present).

Habilitation examination

Jury member, Dr. Slawomir Staworko, Habilitation a diriger des recherches, Université de Lille, December 2015

PhD examination

External examiner, Jesus Dominguez, PhD. Computer Science, King's College London 2016. Topic: "Comparing Combinatory Reduction Systems and Nominal Rewrite systems with atom substitution".

Internal examiner, YuHui Lin, PhD. Computer Science, University of Edinburgh 2015. Topic: "The Use of Rippling to Automate Event-B Invariant Preservation Proofs".

Internal examiner, Gavin Keighren, PhD. Computer Science, University of Edinburgh 2014. Topic: "Restricting Information Flow in Security APIs by Typing".

Internal examiner, John Hewson, PhD. Computer Science, University of Edinburgh 2013. Topic: "Constraint-Based Specifications for System Configuration".

External examiner, Gareth Smith, PhD. Computer Science, Imperial College, London, 2011. Topic: "Local Reasoning about Web Programs".

Internal examiner, Ezra Cooper, PhD. Computer Science, University of Edinburgh, 2009. Topic: "Programming Language Features for Web Application Development".

MSc students

Valentin Caloean, MSc. Computer Science (merit), 2016. Topic: "Parsing And Interpreting The Puppet Configuration Language".

Wen Shi, MSc. Informatics (distinction), University of Edinburgh, 2015. Topic: "Evaluating XML/tree constraint solving algorithms"

Zhuowei Yang, MSc. Informatics, University of Edinburgh, 2015. Topic: "Database Wiki: Role-based access control model".

Mingjun Han, MSc. Informatics, University of Edinburgh, 2014. Topic: "Improving access control policies for DBWiki".

Shasha Song, MSc. Informatics, University of Edinburgh, 2013. Topic: "Database Wiki: Bidirectional synchronization".

Danlin Gu, MSc. Artificial Intelligence, University of Edinburgh, 2013. Topic: "DBWiki: Image Annotation".

Rustam Aliyev, MSc. Computer Science, University of Edinburgh, 2012. Topic: "Database Wiki: Query Optimization".

Mindaugas Tvaronavicius, MSc. Informatics, University of Edinburgh, 2012. Topic: "Update History Visualization in a Database Wiki".

Jiayan Qin, MSc. Informatics, University of Edinburgh, 2012. Topic: "Data visualization based on embedded query for Database Wiki".

Haoli Qu, MSc. Informatics, University of Edinburgh, 2011. Topic: "Chart/graph-based visualization and geospatial visualization for Database Wiki data".

Hui Li, MSc. Informatics, University of Edinburgh, 2011. Topic: "Query optimization for a Database Wiki".

Snehal Waychal, MSc. Informatics, University of Edinburgh, 2011. Topic: "Database Wiki: provenance, querying and visualization".

Tom Bo Liu, MSc. Informatics, University of Edinburgh, 2010. Topic: "Design and implementation of XML access control for a Web database".

Publications

Journal articles

1. James Cheney, Jeremy Gibbons, James McKinna, and Perdita Stevens. On principles of Least Change and Least Surprise for bidirectional transformations. *Journal of Object Technology*, to appear.
2. James Cheney. A simple sequent calculus for nominal logic. *Journal of Logic and Computation* 26(2):699-726, 2016.
3. Luc Moreau, Paul Groth, James Cheney, Simon Miles and Timothy Lebo. The rationale of PROV. *Journal of Web Semantics*, 35 (2015) 235–257.
4. Timothy McPhillips, Tianhong Song, Tyler Kolisnik, Steve Aulenbach, Khalid Belhajjame, R. Kyle Bocinsky, Yang Cao, James Cheney, Fernando Chirigati, Saumen Dey, Juliana Freire, Christopher Jones, James Hanken, Keith W. Kintigh, Timothy A. Kohler, David Koop, James A. Macklin, Paolo Missier, Mark Schildhauer, Christopher Schwalm, Yaxing Wei, Mark Bieda, and Bertram Ludscher. YesWorkflow: A User-Oriented, Language-Independent Tool for Recovering Workflow Information from Scripts. *International Journal of Digital Curation*, 10(1):298–313, 2015.
5. Umut A. Acar, Amal Ahmed, James Cheney and Roly Perera. A core calculus for provenance. *Journal of Computer Security*, 21:919–969, 2013.
6. James Cheney. Revisiting “Forward Node-Selecting Queries over Trees”. *Transactions on Database Systems* 38(2):13, 2013.
