## Course Finalé

Robert B. Fisher
School of Informatics
University of Edinburgh

Course Finalé Slide 2/2

## The Course

- Intensity, video, stereo and range sensors
- Feature detection: curve segmentation, Canny edges, plane region growing, RANSAC line detector, least square estimation
- Geometric coordinate systems, modeling, recognition and pose estimation: 2D and 3D
- Matching algorithms: Interpretation Tree
- Match verification by feature alignment
- Change detection and motion tracking
- Point distribution modelling for variable shapes

## A lot! Well done
