Course Finalé

Robert B. Fisher
School of Informatics
University of Edinburgh

The Course

- Intensity, video, stereo and range sensors

- Feature detection: curve segmentation, Canny edges, plane region growing, RANSAC line detector, least square estimation

- Geometric coordinate systems, modeling, recognition and pose estimation: 2D and 3D

- Matching algorithms: Interpretation Tree

- Match verification by feature alignment

- Change detection and motion tracking

- Point distribution modelling for variable shapes

A lot! Well done
