

Description Introduction Problem

What families of descriptions can be used to describe an image region?

ANSWER:

There are a variety of aspects of an image region that can be described. Some of the main ones are: 1) the shape of the boundary, 2) some special places along the boundary, 3) the shape of the interior, 4) the texture of the interior, 5) the color of the interior, and 6) some special places in the interior.
