Call for Papers

IET Computer Vision

Special Issue:
Computer Vision for Animal Biometrics

The development of computer vision approaches that detect and describe animal life in image or video data is an emerging subject in machine vision. First real-world applications are now becoming available to assist work in a variety of areas; including ecology, agriculture, conservation, and the behavioral sciences.

This special issue seeks to bring together and organize a collection of recently developed approaches in this domain. It is intended to provide an international forum for researchers to report recent developments in the field in an original research paper style.

The topics include, but are not limited to:

- detection and recognition of animals
- automated visual species classification
- visual population count and census applications
- individual animal identification
- animal tracking and movement analysis
- monitoring animal traits, behaviour and health
- real-world animal biometrics systems

All submissions are subject to the journal’s peer-review procedures. The authors should follow the journal’s Author Guide at http://digital-library.theiet.org/journals/author-guide when preparing papers for submission to the Special Issue.

For enquiries regarding this Special Issue please contact the Guest Editors:

Tilo Burghardt (Lead Guest Editor)  
University of Bristol  
E: tilo@cs.bris.ac.uk

Robert Fisher  
University of Edinburgh  
E: rbf@inf.ed.ac.uk

Sai Ravela  
MIT  
E: ravela@mit.edu

Important dates:
Submission deadline: 31 Jan 2017
Publication date: Oct 2017

Open Access Publishing Now Available

Editor-in-Chief: Professor Majid Mirmehdi, University of Bristol, UK

IET Journals  
The Institution of Engineering and Technology
Open Access Publishing Now Available

In addition to the traditional subscription-funded model, The IET now offers a gold open access publication option in *IET Computer Vision*. This allows authors to disseminate their research to a wider audience. Please contact us if you require any further information.

What is Open Access Publishing?

Open access publishing enables peer reviewed, accepted journal articles to be made freely available online to anyone with access to the internet. Open access publishing with the IET is funded through author publication charges. This model differs from the subscription based publishing model, whereby readers (or more commonly, readers’ institutions) pay for access to journal articles. For more information, contact us on journals@theiet.org.

Why publish in IET *Computer Vision*?

- Worldwide readership and database coverage - including IET *Inspec*, SCI, SCI-E, Scopus & Ei Compendex, allowing your research to be easily accessed
- Online submission and tracking for up-to-date progress of your paper
- Prompt and rigorous peer review provides authors with a quick decision about publication
- Open access option available in all IET journals allows authors to disseminate their research to a wider international audience and is made freely available online
- IET journals are available online via the IET Digital Library and IEEE Xplore for easy sharing of your research
- Articles are published e-first in advance of the printed publication making your research available at the earliest opportunity

The Institution of Engineering and Technology (IET) is working to engineer a better world. We inspire, inform and influence the global engineering community, supporting technology innovation to meet the needs of society. The Institution of Engineering and Technology is registered as a Charity in England and Wales (No. 211014) and Scotland (No. SC038698).
