

# Women in Computing in South Africa and other sub-Saharan countries

Vashti Galpin

School of Informatics, University of Edinburgh

ACM-W Ambassador for South Africa

(Thanks to Hlamalani Huhlwane and Kegomoditswe More)

10 June 2008

# Introduction

- ▶ my background
  - ▶ an indirect route to becoming a theoretical computer scientist

# Introduction

- ▶ my background
  - ▶ an indirect route to becoming a theoretical computer scientist
- ▶ status of women in computing in South Africa
  - ▶ what?
  - ▶ why?
  - ▶ how?

# What is the current situation in South Africa?

## What is the current situation in South Africa?

- ▶ university and technikon data up to 2001 (published by the South African Qualifications Authority)

## What is the current situation in South Africa?

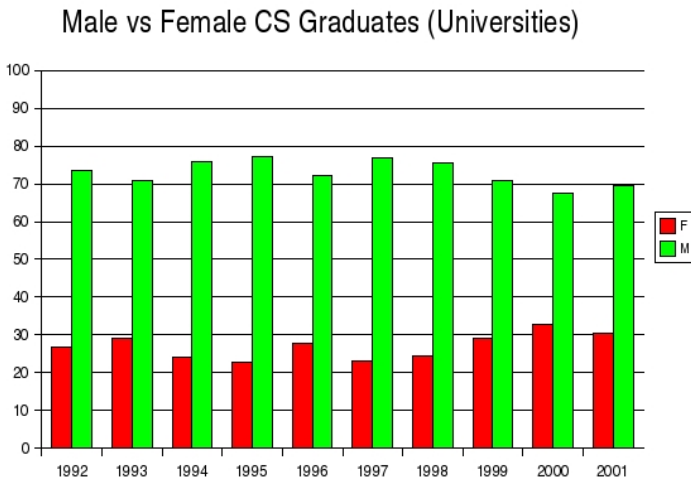

- ▶ university and technikon data up to 2001 (published by the South African Qualifications Authority)
- ▶ industry
  - ▶ limited data
  - ▶ confusion between high-level ICT involvement and ICT usage

## What is the current situation in South Africa?

- ▶ university and technikon data up to 2001 (published by the South African Qualifications Authority)
- ▶ industry
  - ▶ limited data
  - ▶ confusion between high-level ICT involvement and ICT usage
- ▶ joint SA-Finnish study from 2006
  - ▶ very complete assessment of the situation
  - ▶ statistics from government labour survey

# University gender data, South Africa 1992-2001

# University gender and race data, South Africa 1992-2001

## Female CS Graduates by Race (Universities)

# Discipline comparison, South Africa 2001

## Male vs Female Graduates Across Disciplines (All Institutions)

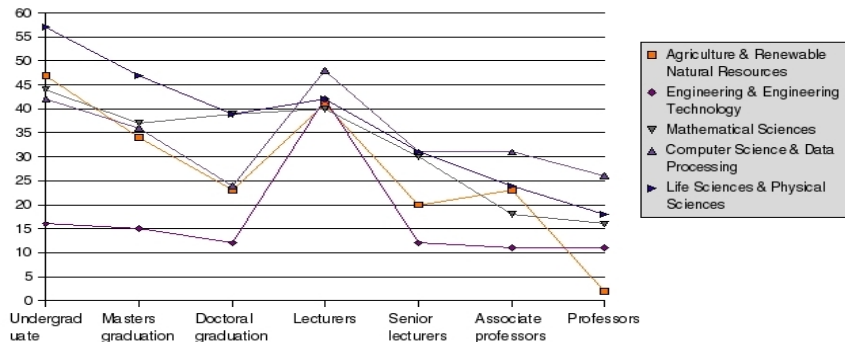

# Discipline comparison over time, South Africa 1992-2001

## Comparison of Female Graduates Across Disciplines (All institutions)

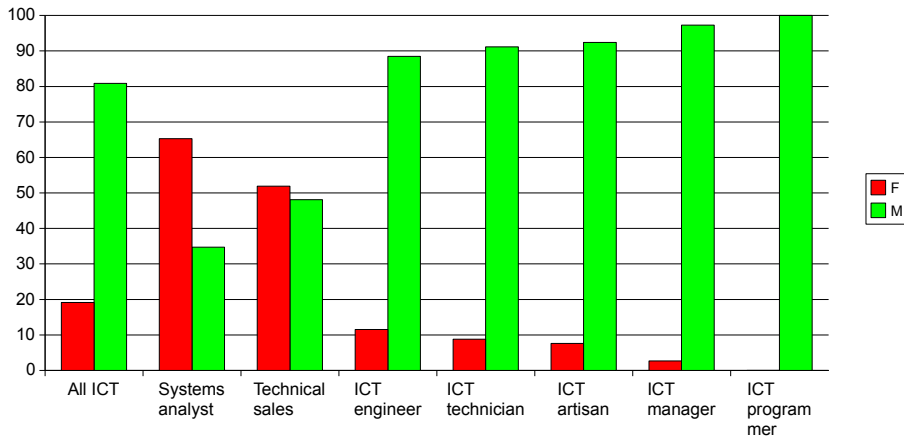

## Discipline pipeline, South Africa 2001

Percentages of women in the Natural Sciences & Engineering in the university sector by sub- field (2001)

# Industry, South Africa 2005

## Male vs Female ICT Occupations

# Why do we have this situation?

## Why do we have this situation?

- ▶ perceptions of computer science
  - ▶ clerical, use of application software
  - ▶ little involvement with people
  - ▶ only programming, no awareness of breadth
  - ▶ seen as male discipline
  - ▶ general lack of knowledge

## Why do we have this situation?

- ▶ perceptions of computer science
  - ▶ clerical, use of application software
  - ▶ little involvement with people
  - ▶ only programming, no awareness of breadth
  - ▶ seen as male discipline
  - ▶ general lack of knowledge
- ▶ lack of role models and career counselling
  - ▶ poor subject choices at school
  - ▶ stereotyping of careers

## Why do we have this situation?

- ▶ perceptions of computer science
  - ▶ clerical, use of application software
  - ▶ little involvement with people
  - ▶ only programming, no awareness of breadth
  - ▶ seen as male discipline
  - ▶ general lack of knowledge
- ▶ lack of role models and career counselling
  - ▶ poor subject choices at school
  - ▶ stereotyping of careers
- ▶ surprisingly, lack of access can correlate with higher interest

# How can the situation be changed?

## How can the situation be changed?

- ▶ selection of current and ongoing activities

## How can the situation be changed?

- ▶ selection of current and ongoing activities
  - ▶ school: Dinaledi, Mathematics and Science Camps for Girls

## How can the situation be changed?

- ▶ selection of current and ongoing activities
  - ▶ school: Dinaledi, Mathematics and Science Camps for Girls
  - ▶ university: SA-WISE, breadth-first first year course

## How can the situation be changed?

- ▶ selection of current and ongoing activities
  - ▶ school: Dinaledi, Mathematics and Science Camps for Girls
  - ▶ university: SA-WISE, breadth-first first year course
  - ▶ industry: WIIT, Vodacom Graduate Programme, LinuxChix Africa, WICT, Women'sNet

## How can the situation be changed?

- ▶ selection of current and ongoing activities
  - ▶ school: Dinaledi, Mathematics and Science Camps for Girls
  - ▶ university: SA-WISE, breadth-first first year course
  - ▶ industry: WIIT, Vodacom Graduate Programme, LinuxChix Africa, WICT, Women'sNet
- ▶ interventions suggested by SA-Finnish research project

## How can the situation be changed?

- ▶ selection of current and ongoing activities
  - ▶ school: Dinaledi, Mathematics and Science Camps for Girls
  - ▶ university: SA-WISE, breadth-first first year course
  - ▶ industry: WIIT, Vodacom Graduate Programme, LinuxChix Africa, WICT, Women'sNet
- ▶ interventions suggested by SA-Finnish research project
  - ▶ South African resource centre for women in ICT
  - ▶ increased research capacity in women and ICT
  - ▶ workable and integrated system for measuring ICT involvement
  - ▶ training programmes for school teachers
  - ▶ training programmes for girls and young women
  - ▶ dissemination and awareness raising activities

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information
- ▶ research focus is often on ICT usage in development

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information
- ▶ research focus is often on ICT usage in development
- ▶ low participation in tertiary education
  - ▶ Eritrea 10%, Botswana 10%, Kenya 15%
  - ▶ Uganda 27%, Nigeria 30%, South Africa 31%

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information
- ▶ research focus is often on ICT usage in development
- ▶ low participation in tertiary education
  - ▶ Eritrea 10%, Botswana 10%, Kenya 15%
  - ▶ Uganda 27%, Nigeria 30%, South Africa 31%
- ▶ Cisco Networking Academy Gender Initiative
  - ▶ Rwanda, South Africa, Uganda

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information
- ▶ research focus is often on ICT usage in development
- ▶ low participation in tertiary education
  - ▶ Eritrea 10%, Botswana 10%, Kenya 15%
  - ▶ Uganda 27%, Nigeria 30%, South Africa 31%
- ▶ Cisco Networking Academy Gender Initiative
  - ▶ Rwanda, South Africa, Uganda
- ▶ industry
  - ▶ developing countries in general: women in low-level jobs
  - ▶ word processing and data entry

## Other sub-Saharan countries

- ▶ difficult to find statistics or other information
- ▶ research focus is often on ICT usage in development
- ▶ low participation in tertiary education
  - ▶ Eritrea 10%, Botswana 10%, Kenya 15%
  - ▶ Uganda 27%, Nigeria 30%, South Africa 31%
- ▶ Cisco Networking Academy Gender Initiative
  - ▶ Rwanda, South Africa, Uganda
- ▶ industry
  - ▶ developing countries in general: women in low-level jobs
  - ▶ word processing and data entry
- ▶ similar reasons to South Africa?

## ACM-W ambassador program

- ▶ ACM's Committee on the Status of Women in Computing

## ACM-W ambassador program

- ▶ ACM's Committee on the Status of Women in Computing
- ▶ ambassador program started by Tracy Camp and Denise Gürer

## ACM-W ambassador program

- ▶ ACM's Committee on the Status of Women in Computing
- ▶ ambassador program started by Tracy Camp and Denise Gürer
- ▶ goal of expanding ACM-W beyond North America

## ACM-W ambassador program

- ▶ ACM's Committee on the Status of Women in Computing
- ▶ ambassador program started by Tracy Camp and Denise Gürer
- ▶ goal of expanding ACM-W beyond North America
- ▶ ambassadors to provide information about women in computing in their country

## ACM-W ambassador program

- ▶ ACM's Committee on the Status of Women in Computing
- ▶ ambassador program started by Tracy Camp and Denise Gürer
- ▶ goal of expanding ACM-W beyond North America
- ▶ ambassadors to provide information about women in computing in their country
- ▶ Australia, Canada, Germany, India, New Zealand, Pakistan, South Africa, Turkey, UK, USA
