In preparation for the review meeting and for the project conclusion, I would request that you send me and the experts the various documents which are described in full detail in the annex 1 to this letter. Please pay

particular attention to the requested deadlines and formats. For your information, I also enclose the “guidelines” that we use to brief reviewers on their tasks.

With regard to reporting modes, our financial department requests that two separate cost statements be submitted: the first one will cover the initial reporting period, the second the extension. The same rule will apply to the corresponding periodic progress reports.

Once I receive the review material, I will let you know whether any modifications need to be made to the agenda. Please let me know in advance in case of any problems or specific requirements you might have for the review (e.g. for demonstrations).

At the start of the review session please provide the commission and the reviewers with paper copies of the slides used for the project presentations during the session.

I look forward to seeing you at the review.

Yours sincerely,

Wide Hogenhout
